

On Time Tracking is one of our top priorities. Our cargo tracking system is designed for easy reference from origin to destination and is updated daily via e-mail.

Customer Service representatives are dedicated to provide only the best transportation services at the most economical cost without sacrificing quality.

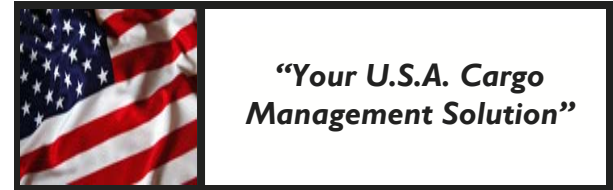

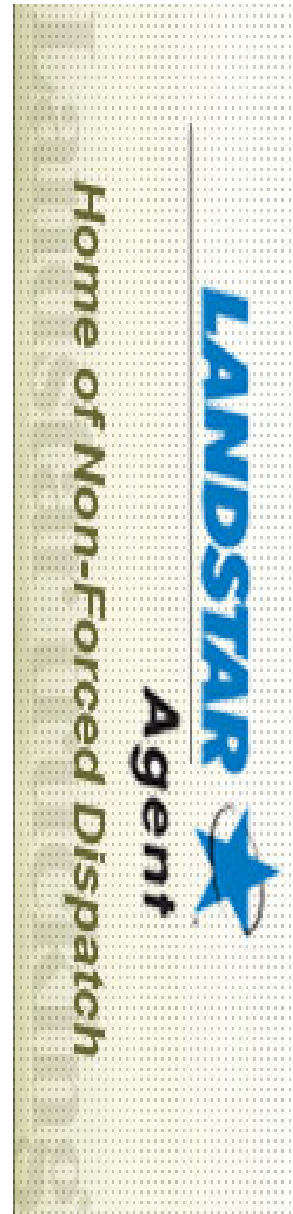

Hardcopy Documentation is easily obtained for any shipment.

Cargo Communication is never an issue. All shipments are always monitored by a representative linked to our Tech Center.

Adding Value to Your Supply Chain

Our domestic freight forwarding staff is fully trained to understand the intricacies of your business and offer value in your supply chain process. If you need to move it, our experts have a freight forwarding solution. Our expert freight shipping personnel have experience moving freight for virtually every industry.

Custom Shipping Solutions

Known for our expert handling of routine shipments, Cargo Solutions USA also provides custom shipping solutions that require extra care and service while still meeting the time, budget and specific requirements of your freight.

No Limitations

Through our long established relationships with domestic carriers, we manage local, regional, long haul LTL (less-than-truckload), and FTL (full truckload) shipments. We have no size or weight limitations and, by working directly with carriers, we minimize the potential for damage while expediting your freight.

We Understand Shipping

We understand the best ways to move any size shipment to and from anywhere in the United States. We'll arrange customized domestic freight transportation services that meet your specific needs. You do not have to deal with paperwork and invoices from multiple vendors, because we will send you a single invoice for everything.

Our Mission

We are committed to provide high quality services through our expertise, satisfying the requirements and best interest of our clients and partners that will foster good relations that to ensure continued growth for the complete supply chain.

Our organization consistently strives to maintain a professional staff with superior expertise in every aspect of the logistics supply chain.

Company History

Cargo Solutions USA, Inc. (CSI) founders started in the SFO Local Air Freight pickup & delivery industry in 1975. We realized that in order to provide a supply chain solution to our customer's we needed to expand into other facets of cargo transportation. In 1995 we began to offer service between San Francisco & Los Angeles. When the demand for service grew to encompass a larger geographical area, the company responded quickly in 2001 offering services to all 50 states including parts of Canada and Mexico. Today, we continue to diversify our services under our own logistics authority to include: Intermodal-rail, Ocean and Surface Expedite becoming a single source outlet for many of our customer's transportation departments.

Cargo Solutions USA became affiliated as an agent for Landstar of Rockford, IL / Jacksonville, FL in September 2005. Landstar is

one of the largest truckload carriers. Working together, Landstar and its network of more

than 1,100 independent sales agents, 8,000 business capacity owners, 23,000 contract carriers, and warehouse capacity owners draw on a variety of equipment. Together we utilize the most innovative technology to ensure every customer a safe, reliable, and cost-effective supply chain solution. All Landstar operating companies are certified to ISO 9001: 2008 quality management systems standards.
